FIG. 11A

FIG. 11B is a schematic diagram of a robot 1100 in a room 1101. The robot 1100 is positioned in the center of the room 1101. The room 1101 includes a sun 1102 in the upper left corner, a table 1103 in the lower right corner, and a chair 1104 in the lower right corner. The robot 1100 has a head 1105 with two eyes 1106 and a mouth 1107. The robot 1100 has a torso 1108 and two arms 1109. The robot 1100 has a base 1110 with two wheels 1111. The robot 1100 is facing the sun 1102.

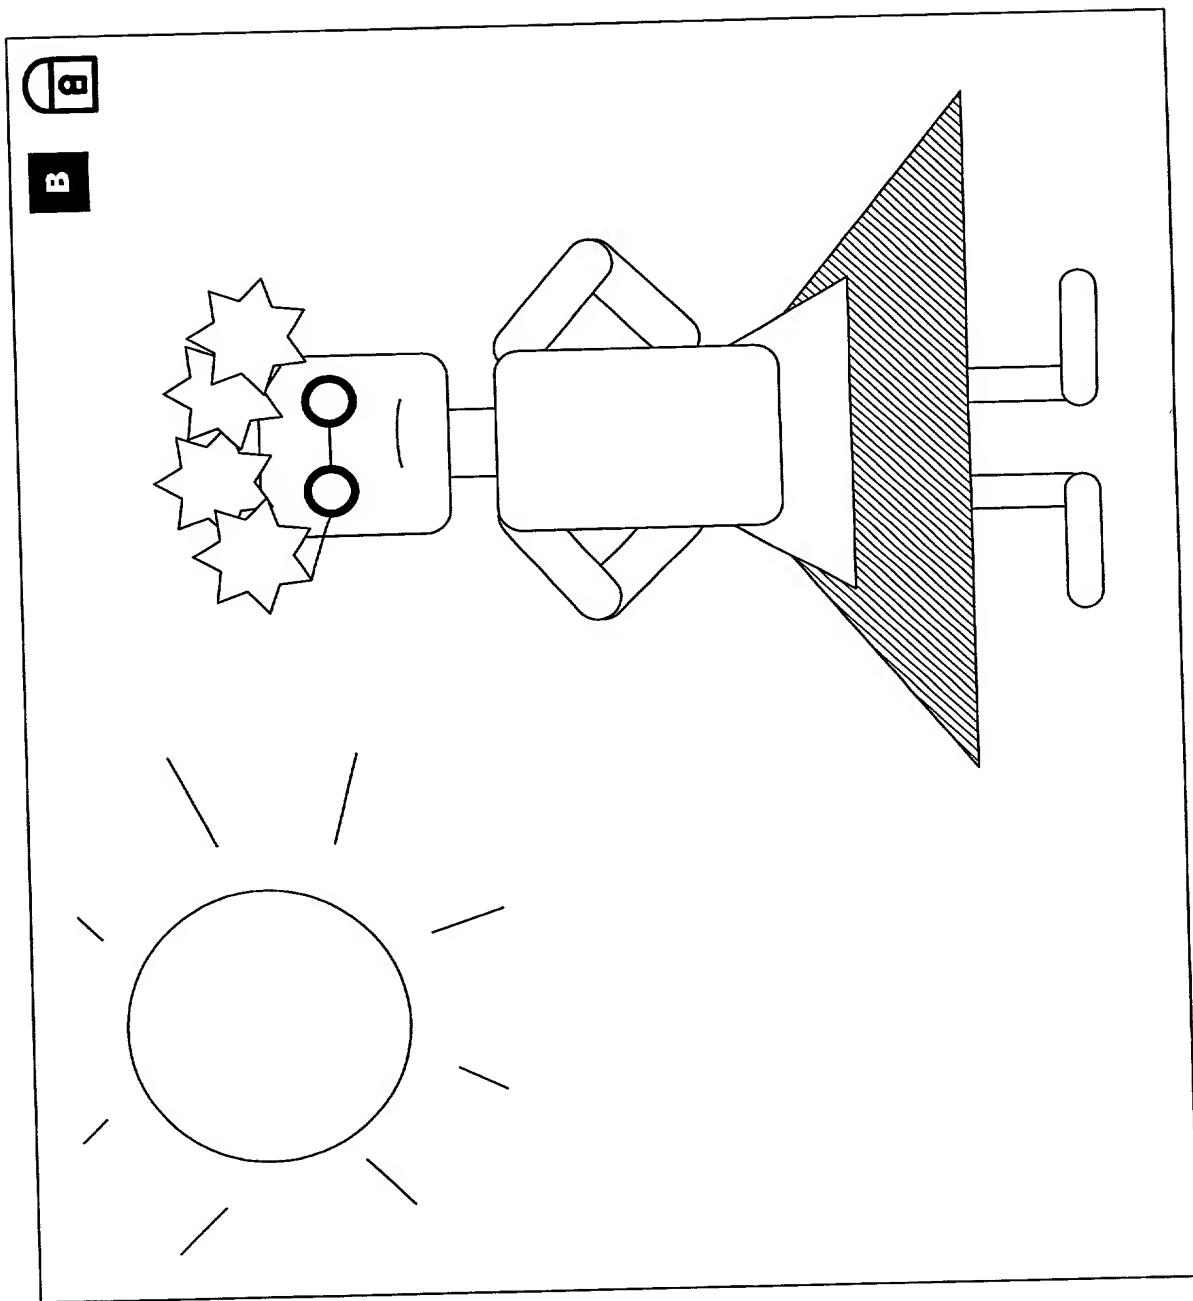

FIG. 11B

FIG. 12 is a block diagram of a system for controlling a television set. The system includes a television set 100, a remote control 110, and a control unit 120. The control unit 120 is connected to the television set 100 and the remote control 110. The control unit 120 receives signals from the remote control 110 and controls the television set 100. The control unit 120 also controls the remote control 110. The control unit 120 is a microprocessor-based system. The control unit 120 includes a memory 122 and a processor 124. The memory 122 stores data and instructions. The processor 124 executes the instructions and controls the television set 100 and the remote control 110. The control unit 120 is connected to a power source 130. The power source 130 provides power to the control unit 120. The control unit 120 is also connected to a network 140. The network 140 is used for communication between the control unit 120 and other devices. The control unit 120 is a part of a larger system for controlling a television set. The control unit 120 is a microprocessor-based system. The control unit 120 includes a memory 122 and a processor 124. The memory 122 stores data and instructions. The processor 124 executes the instructions and controls the television set 100 and the remote control 110. The control unit 120 is connected to a power source 130.
